BASIC-ABSTRACT:

NOVELTY - An interview learning method according to steps using the internet is provided to allow an applicant to experience the learning of the interview easily and interestingly, and the learning suitable for each applicant, by supplying a virtual interview environment in an interactive manner on the internet, and by storing each applicant's characteristic in a database for a learning program.

DETAILED DESCRIPTION - It is checked if the visitor who accesses a web site is a member (S100,S110). If the visitor is the member, the proceeding state of an interview learning is checked (S120). According to the state thereof by each step of the member, the corresponding course of the interview learning is performed(S130,140). The member is tested in the course of the interview learning (S150). It is determined if the member has passed a reference level of the course(S160). If the member has passed the reference level, the next course thereof is proceeded, otherwise the course prior to the tested course is performed again(S170).
